PROFILE

With experience in Aviation and flight training I approach challenges in a solution-driven manner and with decomposition methods.

Witnessing the impact of software on Aviation operations efficiency, I was inspired to become a developer.

My goal is to use my strong logic and problem-solving skills to create effective technological solutions for the aviation industry.

SKILLS

Python, HTML, CSS, Saas, Javascript, React, NodeJS, Express, MySQL, MongoDB

EDUCATION

BrainStation | Diploma, Web Development

JAN 2022 - APRIL 2022, ONTARIO, CA

Mumbai University | Bachelors in Science, Major Aviation

JULY 2010 - 2013, MUMBAI, INDIA

EXPERIENCE

Customer Service Representative | Concentrix

JULY 2019 - 2020, LONDON, ON

- Consistently exceeded sales target by 30% for 3 consecutive months by empathizing with customers and communication skills to close sales.
- Reduced average call times by 10% by analyzing the current process and identifying areas of improvement
- Were selected to be in a team of the first 30 employees out of 400 to work in a new pilot process due to good technical understanding of the product and effective conflict resolution skills.

Operations Assistant | Speedy Transport Group Inc.

JAN 2020 - 2020, LONDON, ON

- Volunteered to plan delivery routes by strategically planning and executing daily tasks in 80% of the assigned time.
- Managed forklift drivers to improve daily performance and assisted them in the following SOP.
- Improved efficiency by Designing and implementing a new logging system for all the truck and forklift drivers.

Instructor | Aetos Aviation LLP.

DEC 2016 - 2019, MUMBAI, INDIA

- Headed flight training consultancy for aspiring commercial pilots and helped it grow 15% growth year over year by learning and applying new management skills.
- Designed and conducted a ground training program to pass licensing exams, resulting in a 90% passing rate every year.
- Worked with multiple international institutes in Europe to induct the right candidates into their advanced training programs.

PROJECTS

Full-Stack Developer | InStock

MAR 2022, BRAINSTATION - HACKATHON

- This is an Inventory Management System. Our team's goal was to deliver this time-sensitive, full stack application with a modern React front-end communicating with a robust Express back-end. Our team of 6 student developers worked on the project and delivered it in a week using SCRUM.

Full-Stack Developer | Sudoku Solver Visualizer

APRIL 2022, BRAINSTATION

- The Application can create new sudoku puzzles with the level of difficulty the player chooses. It can record the time taken to solve the puzzle and rank it according to the least time. The App can solve the puzzle and visualize it using Depth-first Search and Best First Search Backtracking algorithm.
